

There is no law that says teaching has to be boring and dull.

The Delta Learning System supports Authentic Teaching

What is Authentic Teaching?

- ❖ Authentic Teaching is teaching that promotes high quality learning
- ❖ **Teaching that requires student to Think**
Develop in-depth understanding and Apply academic learning to realistic problems.

With the Delta System:

Students are seen and treated as individuals.

Students are active learners instead of passive participants.

Knowledge is constructed out of the interaction of ideas & experiences of teachers, students and society.

Connections made across lessons & domains. Collaboration is promoted.

Education has been fragmented and often fails to give students a clear picture of the relationship of school work to the “real world”.

TEACH YOURSELF TO LEARN

Introducing DELTA LEARNING SYSTEM

How often does your child use the word *boring*?

How *happy* is your child with school?

Discover the key to *motivating* children!

*Motivate your children
and
reduce your stress level*

What is DELTA?

The “DELTA LEARNING SYSTEM” is a programme of continuous growth & development of the individual.

The system caters to everyone from early childhood to old age with the main focus on 5 to 19 years-old.

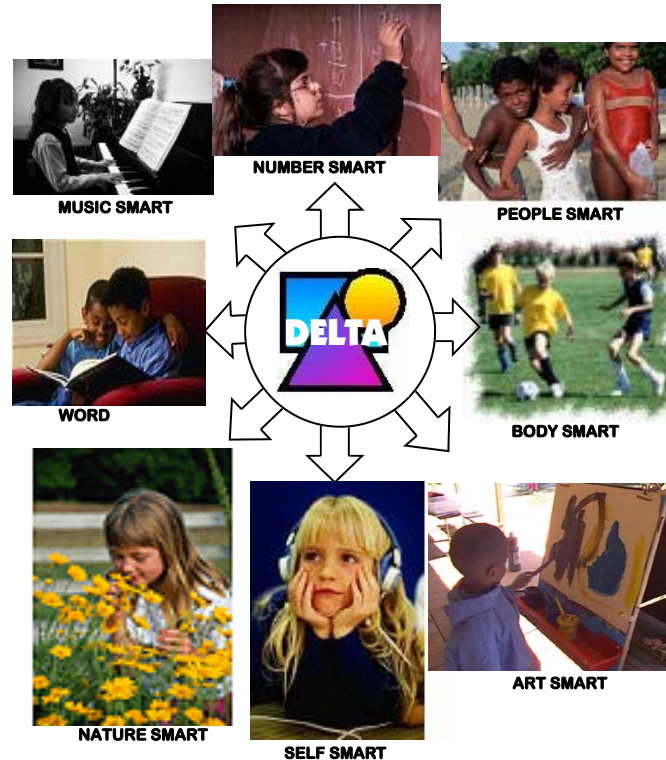

The DELTA LEARNING SYSTEM recognises the importance that **Learning Style**, **Personality Traits** and **Multiple Intelligences** play in effective learning.

All learners are taught according to their own unique profile...even in a group environment.

Parents, Students & Teachers have endorsed the system.

How the System works:

1. Appointment made for student assessments.
2. Assessments done at Home, School or the Delta Centre.
3. Two sets of reports presented to School and Parents.
4. Results explained in detail to Parents and Teachers.
5. Learning strategies agreed between Parents, Teachers and Delta.
6. **Programme of continuous improvement** including self-esteem workshop is implemented.

People learn in different ways. Some learn best by seeing, others by hearing, and still others by touching. Knowing our preferred learning style helps us learn and remember new things.

Help your child succeed!

The system is based on the following:

1. People are disposed to knowledge and are **natural learners**.
2. We are all intelligent (It's not how intelligent we are but **in what way are we intelligent**).
3. **Personality & Learning Style** affect learning.
4. **Growth and development** is a result of learning.
5. **Effective teaching** focuses on personality traits, intelligences and learning styles.
6. **No one is too old to learn.**
